# made 2 perform

uvex is back to road – since January 2023 we've been the official suppliers to Intermarché-Circus-Wanty, one of the UCI WorldTour top teams. International stars like Biniam Girmay, Rui Costa and Louis Meintjes count on innovative protection from uvex products when training and competing.

#protectingpeople

The uvex logo is displayed in a bold, white, sans-serif font in the upper left corner of the page. The background is a dark, atmospheric photograph of a forest with tall, thin trees and a forest floor covered in dry leaves and twigs.

**uvex**

**protecting people  
since 1926**

**Professional or recreational.  
Competition or fun. As one  
of the leading international  
manufacturers of protective  
products with headquarters  
in Fuerth, we at uvex inspire  
our customers every day with  
groundbreaking technologies  
and innovative products.**

**24/7 – for almost 100 years.  
To achieve the best, whether  
in leisure, sports or work.  
To protect people.**

# Made in Germany

## Innovative protection since 1926.

MADE IN  
GERMANY

As a partner for international top-level sport, uvex equips many professional athletes worldwide. uvex sports operates throughout the world and plays a decisive role in shaping the uvex brand.

The uvex sports group strives to manufacture its products in Germany where possible, otherwise working with proficient partners. Every uvex helmet is made in uvex.

## MADE IN GERMANY

### Responsibility

for us means ensuring fair working conditions and remuneration, including for suppliers and partners. And being independent of global supply chain issues means we can deliver to retailers and consumers quickly and reliably.

### Quality

for us means placing the highest demands on our products. Developing and testing them in-house and maintaining complete control over the entire supply chain at all times.

### Sustainability

for us means complete control over the materials we use, the reduction of CO<sub>2</sub> emissions due to short delivery routes, and the development of products with excellent, sustainable properties aligned with our "protecting planet" philosophy.

### Competence

is demonstrated daily in our competence centers in Fuerth, Lederdorn and Oberzell. This guarantees that we can react quickly to market and supply developments.

# protecting people protecting planet

For almost 100 years, we've been developing, making and selling products that protect people in their sport, leisure and work activities. And anyone who protects people needs to protect their environment too. That's why we take good care to ensure that the entire value chain – from the product idea and development through to manufacturing and sales – stays in our hands. In our own state-of-the-art factories, mostly in Germany and elsewhere in Europe. Ecologically and economically astute, ensuring fair working conditions and happy staff – that's what we're about. We call it made in uvex. The result: smart and sustainable products that we develop using innovative materials that are uncompromisingly effective in form and function.

The new uvex urban planet city helmet is a great example of that. It's made in Germany, in our own factory, from sustainable materials. Includes optimal protection and an uncompromisingly cool look.

# performance achieved by winners

**Simon Gegenheimer** performs extremely successfully for the MTB Racing Team. This exceptional athlete is UCI Mountain Bike Eliminator World Cup Winner 2021, three-time vice-world champion plus vice-World Champion 2022. The four-time German MTB XCE winner knows what's essential. Starting with uvex helmets and eyewear.

#proudtoprotect

Mercedes-Benz Mercedes-Benz Mercedes-Benz

# top level performance

**Laura Philipp** is one of the world's best female triathletes. She was European IRONMAN champion in 2021 and 2022, five-time IRONMAN and seventeen-time IRONMAN 70.3 winner. She places extremely exacting demands on herself – and her kit. She relies on innovative, high-end protection from uvex helmets and eyewear.

#proudtoprotect

## proud to protect

**Laurenz Rex** has been with the UCI WorldTeam Intermarché-Circus-Wanty since the 2023 season. He achieved his first win in international road cycling at Dorpenomloop Rucphen 2023 and stayed in the top group at the Paris-Roubaix 2023 race, achieving ninth place at the end. On his way to the very top, he always has uvex eyewear and helmets with him.

# colors & trends

Our new collection's fashion-forward colors move between nature and technology, analog and digital. Spirited and discreet. Stylishness is guaranteed.

## teal

Super-modern, profound and rich. At first glance, this trendy new color reflects the characteristics of the digital age: networking, connectivity and speed in endless space. Makes a real statement on your helmet and glasses.

uvex city stride

**57**

uvex react

**71**

uvex city stride

**83**

uvex i-vo cc

**100**

uvex kid 3

## jade

An air of Zen wafts past. Light, natural and understated, it seems to float above things. It's wonderful combined with contrasting colors, but also striking on its own.

## deep space

Technology, digital worlds and dark infinity. A range of colors that can express everything. Night sky and sea, clear yet hazy, cool yet warm. Teams up well with similar colors and is intriguingly distant with contrasting hues.

# More protection with MIPS. A comprehensive safety system. Perfect fit included.

If you fall, a glancing impact to your head can result in a forceful rotational movement of the brain. MIPS, the Multi-Directional Impact Protection System, effectively guards against this and is available in a variety of uvex bike helmets.

uvex rise pro MIPS

**TOC  
SEN**

# If you fall, you're not alone. Tocsen keeps you safe and delivers fast help in an emergency.

No-one around to help? Tocsen technology calls the professionals in an emergency. Its precision sensor detects crashes – and can save lives. If Tocsen gets no response from the rider, it automatically calls the emergency services and sends them the GPS data. It also calls the growing Tocsen community.

Any potential helpers nearby are alerted by the app and can go directly to the accident site to give first aid. The smart safety system is already integrated into the helmet and is ready to use immediately.

**Very visible and  
very protective.  
Ultra-light.  
Ultra-protective.  
And ultra-cool.**

# high performance meets high protection

Top aerodynamics.  
Lightweight. Optimal  
protection. The perfect  
racing helmet.

When a racing helmet is right up front at the Tour de France, you can be sure there's some high-tech behind it. The uvex rise pro sets new standards in functionality and performance. With new ergonomic features. Even better aerodynamics. And integrated MIPS Air Node for perfect protection when it counts.

**#timetoperform**

This system is lighter than in any of our products to date. Thanks to the air stream flowing through the helmet, you'll feel like you're not wearing one at all - just extra protection. If you fall with a glancing impact to the head, Mips Air can help reduce forceful rotational movements to the brain.

- Replacement lining
- Floating lining whose back part is attached to the inner shell with Velcro-type dots.
- If you fall off, the layer detaches from the shell automatically.
- Lower weight, better ventilation

# kids

Whether they're on a bike, skateboard, rollers, balance bike or in the child seat on your bike – the uvex helmet collection for kids ensures they're safe on their way to the playground or school and back home again.

# uvex react jr. MIPS

## Kids rock!

Protection and style are so important when youngsters discover mountain biking for themselves. The uvex react jr. MIPS is ideal: its lower-cut neck and temple areas, plus integrated MIPS, offer even more protection if they fall off.

- MIPS
- Single inmould technology
- 1 shell size
- IAS 3D (2 adjustment options)
- FlexShield
- Lateral height adjustment
- Inner lining in 100 % recycled polyester (hand-washable)
- Bug net
- Weight from 330 g
- Standards: EN 1078

## Tested to standards

Anyone riding with uvex bike helmets rides on the safe side. Because every one of our bike helmets undergoes tough tests in the uvex testing center.

Additionally GS-tested

The voluntary test mark "GS" stands for "Geprüfte Sicherheit" ("tested safety").  
Find details about test criteria: [www.tuv.com](http://www.tuv.com)

European cycling helmet standard

**EN 1078:2012+A1 2012**  
**EN ISO 18527-1:2023 /**  
**EN ISO 18527-1**

---

## Shell materials

### PC

**inmould // double inmould // multi-inmould**

Safety thanks to the strongly bonded PC shell. Double inmould for extra protection along the lower edge.

### ABS

**hardshell**

Proven technology has a hard shell for highly effective protection.

### EPS

**hardshell // inmould**

The protective material comprises microscopically small air chambers that act as shock absorbers for the impact created by a crash.

---

## Shell constructions

### Hardshell

The helmet has a molded outer shell and EPS inner shell for the most efficient safety combination: impact resistant on the outside, shock-absorbing on

the inside. This complex construction allows perfectly placed air vents and channels to be built in, for exceptional wearing comfort.

### Inmould

The protective EPS is injected directly into the polycarbonate shell. This ensures a lightweight helmet construction with the highest impact resistance and perfect bonding between the EPS inner layer and the PC outer layer.

### Double inmould // multi-inmould

The proven inmould construction is fitted with a second or several PC shell(s). It gives extra protection to the outer edge from damage.

---

## Fit

### Shell sizes

Perfect fit = head size and head shape. The uvex range has the perfect shell size for every head, whether large, small, round or angular, from 45 cm to 65 cm.

### Monomatic

The uvex monomatic comfort fastener can be opened and closed with just one hand.

### MIPS

An angled impact generates rotational movements that can cause serious injuries. The MIPS system can reduce the rotational movements and thus reduce the risk of brain damage.

### MIPS + height adjustment

The added height adjustment into the MIPS layer provides even more safety and comfort.

### FAS

Fast Adapting System straps can be easily and continuously tailored to fit your precise head shape.

### Tocsen

The unique system, comprising the innovative crash sensor and the Tocsen app, detects a fall, asks how you're doing and makes an emergency call including GPS location data, if there is no response.

---

## Comfort

### Lining

#### Basic pads

Removable and washable padding.

#### Functional pads

High-quality, moisture-absorbing functional material without anti-bacterial treatment.

#### Vent pads

High-quality moisture-wicking material with embossed ventilation openings. Comfortable and soft on the skin, quick-drying, removable, and washable.

#### X-fit pads

High-quality, structured material for improved ventilation. Removable, washable padding.

### Vent systems

uvex places the highest value on optimal ventilation. Cleverly designed ventilation openings draw fresh air in and expel warm air.
