made 2 perform

uvex is "back to road" – since January 2023 we've been the official suppliers to Intermarché-Circus-Wanty, one of the UCI WorldTour top teams. International stars like Biniam Girmay, Rui Costa and Louis Meintjes count on innovative protection from uvex products when training and competing.

#protectingpeople

**protecting people
since 1926**

**Professional or recreational.
Competition or fun. As one
of the leading international
manufacturers of protective
products with headquarters
in Fuerth, we at uvex inspire
our customers every day with
groundbreaking technologies
and innovative products.
24/7 – for almost 100 years.
To achieve the best, whether
in leisure, sports or work.
To protect people.**

cross country performance

The MTB Racing Team is known for its top performance. With male and female world champions and other top titles. The mountain biker **Marion Fromberger** is one of them. Won the 2020 European championship. Has been second in the Short Track XCC world cup rankings since 2021. Won twice in 2022 at the Eliminator XCE and became German champion. She trains in a team and delivers top performance. Always with her: uvex eyewear and helmets.

#proudtoprotect

high-end performance

Laurenz Rex has been with the UCI WorldTeam Intermarché-Circus-Wanty since the 2023 season. He achieved his first win in international road cycling at Dorpenomloop Rucphen 2023 and stayed in the top group at the Paris-Roubaix 2023 race, achieving ninth place at the end. On his way to the very top, he always has uvex eyewear and helmets with him.

#proudtoprotect

protecting
people
protecting
planet

For almost 100 years, we've been developing, making and selling products that protect people in their sport, leisure and work activities. And anyone who protects people needs to protect their environment too. That's why we're very vigilant with the entire value chain - from the product idea and development through to production and sales.

In our own state-of-the-art factories as well as at our partner companies, we ensure that we always act in an ecologically and economically astute manner. The result: intelligent products produced in a responsible way, featuring the highest levels of protection and uncompromising excellence in design and function.

All of our sports eyewear provides **100%** UVA, UVB and UVC protection up to 400 nm. We equip them with the highest-quality lens technologies, such as supravision®, colorvision®, and polavision®.

At least **70%** of the uvex Eyewear Collection frames are partly made (about 45%) of bio-based plastics.

We go even further with some sports eyewear models. The uvex esntl spirit has a frame made of **100%** recycled nylon, while the uvex esntl urban frame is made of **100%** ocean waste.

The proportion of sustainable uvex products increases every year. Because we love the planet.

lens tech

Everything in view: on trails, in races, for outdoor and leisure.

Lens technology is the uvex brand's DNA. The result of in-house engineering and our own production facilities. High tech, high quality, perfect vision guaranteed.

uvex colorvision® (CV): wow effect included

- Ultimate contrast enhancement
- Maximized color perception
- 100% UVA, UVB, UVC protection up to 400 nm

uvex polavision® (P): less glare, more joy

- Fewer distracting reflections
- Minimized glare reduces eye strain
- Better detail vision, even in difficult light conditions

**uvex variomatic® (V):
the quickest reaction you can imagine**

- Automatic, stepless self-tinting
- Three protection levels in one product (cat. 1-3)
- From light to dark in 25 seconds

**uvex supravision®:
unequaled anti-fog performance**

- 200% more anti-fog (vs. standard)
- 100% UVA, UVB, UVC protection up to 400 nm
- Unbreakable for maximum protection

performance

Perfect pace, perfect race.

Speed. Headwind. Changing light conditions. Whatever, you're still leading the pack. Pushing yourself to the limit, whether racing or training. With uvex eyewear and helmets, you're uncompromisingly safe and prepared for any situation. With innovative technologies for the best protection. For real winners who love stand-out design as much as top performance.

uvex pace stage CV

Absolutely no limits.

A super-sporty look combined with outstanding lens technology. The uvex pace stage CV give you top style as well as contrast-enhanced vision thanks to uvex colorvision® lens technology.

tech summary

Lens technology

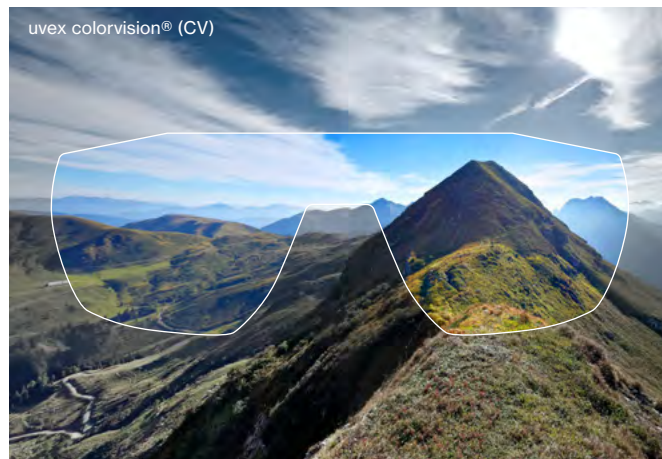

uvex colorvision®

The four innovative uvex colorvision® tints provide ultimate contrast and perfect vision – with a matching lens for every situation.

- Ultimate contrast enhancement
- Maximum color perception
- 100% UVA, UVB, UVC protection up to 400 nm

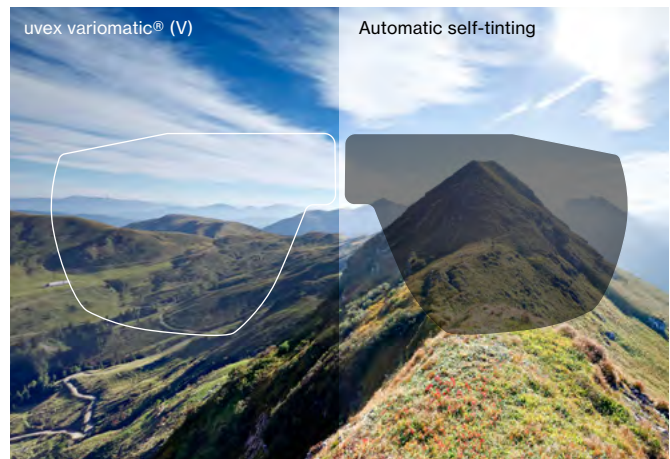

brown amber green smoke

uvex variomatic®

Eyewear with uvex variomatic® automatically reacts to the natural light conditions.

- Automatic, stepless self-tinting
- From light to dark in 25 seconds
- Three levels of protection in one lens (cat. 1–3 and cat. 2–4)
- 100% UVA, UVB, UVC protection up to 400 nm

uvex supravision®

The uvex supravision® coating ensures fog-free vision without affecting the optical quality of the lens. It remains fog-free for twice as long as specified by the standard.

- 200% more anti-fog (vs. standard)
- Break-resistant for maximum protection
- 100% UVA, UVB, UVC protection up to 400 nm

uvex polavision®

Reliable protection against reflections and glare: the lenses of the uvex polavision® series absorb diffused light and reliably protect the eyes from overexertion.

- Polarizing lenses against annoying reflections
- Reduce stray light and glare
- For a comfortable viewing experience

uvex colorvision® variomatic®

uvex variomatic® meets uvex colorvision® technology: lens tinting and contrast enhancement – in a single, innovative uvex lens. Made for sports activities in any weather and any environment.

Decentered lens technology

Distortions and curvatures in the field of view can quickly lead to irritation. uvex therefore uses grade 1 decentered lenses, which allow a distortion-free view.

Direct lens ventilation

The uvex temperature competence ensures permanent, draft-free ventilation. This keeps the field of view fog-free twice as long as conventional standards demand.

Easy to clean

The special coating on the lens allows moisture or fingerprints to be easily removed.

VPX

uvex sunglasses with variomatic polavision extended technology (VPX) – featuring automatic, stepless self-tinting in all light conditions, as well as secure protection against glare and annoying reflections.

Interchangeable lenses

Interchangeable lenses guarantee uncomplicated handling and perfect visibility in all weather conditions.

Robust and scratch-proof

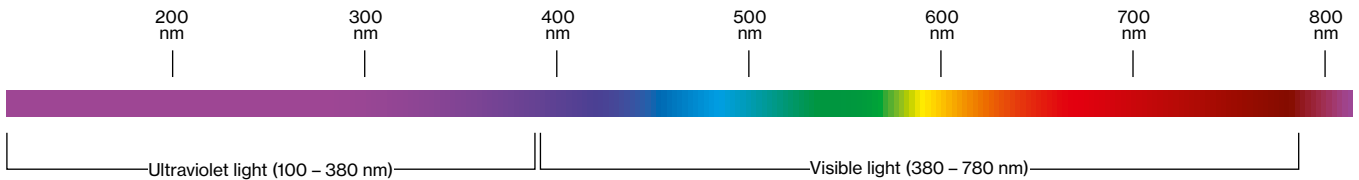

Made of extremely durable polycarbonate, the lenses withstand temperatures down to –40 °C without compromising mechanical strength. A special coating to protect against damage according to standard EN ISO 12312-1 makes the lenses scratch-resistant without impairing the view.

Soft nose pads and earpiece ends

A pair of glasses fits perfectly when you cannot feel them. Soft nose pads and soft earpiece ends ensure pressure-free wearing comfort. The soft earpieces are cold-formable on a variety of models. They ensure a perfectly secure fit.

UV protection

Ultraviolet absorbers integrated directly into the raw material filter 100% of harmful UVA, UVB, and UVC radiation up to 400 nm.

100% UV protection up to 400 nm

Our UV absorber offers 100% protection against damaging UV rays up to 400 nm.

tech summary
